Herpotherm

In summary of the device it prevents cold sores from occurring. This device is the size of a lipstick that is meant to be used as soon as the tingling sensation is felt by the client. It operates as a 4 second burning sensation at 51° Celsius that destroys the proteins of the cold sore. I would like to add that I have tried it as I suffer from cold sores regularly and it does work.

*Do you suffer from fever blisters?
Herpotherm is for you !*
